We introduce ourselves as manufacturer of polypropylene micron cartridge filters for industrial use.

This 2.5" Diameter × 10 " , 20 " 30" and 40 " length is a 5 Micron sediment filter replacement cartridge made of melt blown polypropylene. These filter contains no binders, agents, solvents, antistatic materials or wetting agents and is made of virgin material . This polypropylene water filter reduces sediment, dirt, sand, silt, rust, limescale, and other impurities in your water. This sediment water filter is available in wide range of lengths and micron ratings,. Constructed of food grade melt blown polypropylene fibers which filters out numerous particulates.

Please revert with your size and quantity requirements enabling us forward our best rates.
